Pre-Fabricated Armored Deck

Pre-fabricated armored deck truck scale guarantees fast and easy installation

High Accurate Weighing

Good traction when wet

Affordable vs Metal Type

Thermal Resistance

Chemical Resistance

Electrical Resistance

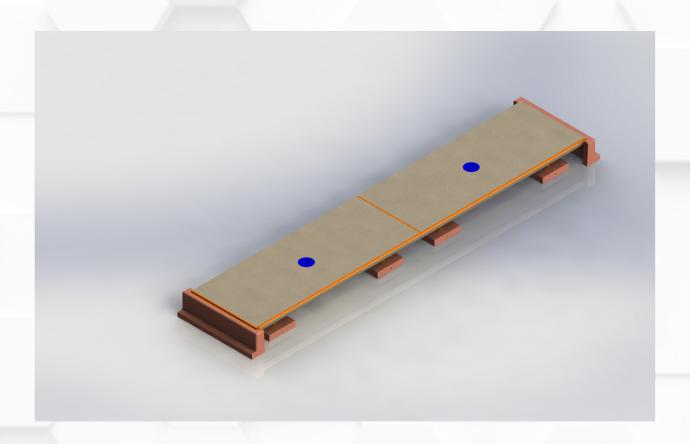

The Pre-fabricated Armored Deck truck scale can be installed in a wide variety of conditions and industries.

As all components were built in factory, the process of installation is easy and fast. But, for remote areas, where the transportation is a demanding job, this type is not a right choice because of time and cost of transportation.

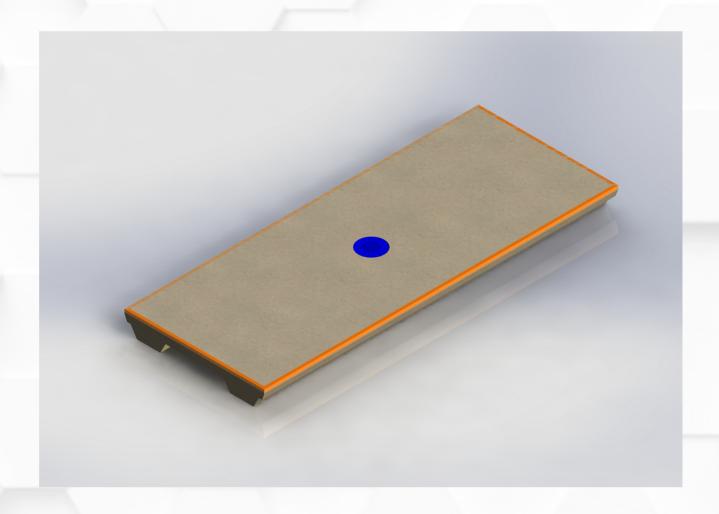

As far as affordability is concerned, this concrete type is more affordable because of using less metal rebar. In comparison with metal truck scale, this model has a great performance in wet conditions and it is the reason that this model has more demand in geographical region where the average rainfall is high.

Features

- · High Accurate Weighing
- Reliable Performance
- Long-lasting Life Cycle
- Good traction when wet
- Affordable in Comparison with Metal Type
- Thermal Resistance
- Chemical Resistance
- Electrical Resistance

Technical Specification

		Pre-fabricated /	Armored Deck		
No.	Item	Specification			
1	Platform (deck surface)	Pre-fab Metal/concrete			
2	Load-Cell	Type / Class: Compression / C3 to C6 Protection Class: IP 68 (IP 69R)			
		Material: Stainless Steel			
		Operating Temperature: -40°C+80°C			
		Capacity (per load cell): 30t – 40t			
3	Axle limits (CLC)	40 Tons			
4	Protection	Type: L-shape Bumper			
		No:10-16			
5	Mounting access plate	Yes			
6	Foundation	Pre-Fab foundation / on Site Constructing			
8	Indicator Model	PU850 or PU750+			
9	Junction Box	Protection class: IP65 Housing: Stainless Steel			
10	Mounting	High pressure resistance alloy			
11	Color	Alkyd Zinc-Chromate Primer NZ-203			
12	Types*	Capacity	Dimension (m)	Load Cell Quantity	Division**
		50	3*8	5	5
		60	3*16	8	5
		80	3*16 & 3*18	8	10
		100	3*18	8	10
		120	3*18	8	20
		150	3*24	10	20

High Quality and Accuracy Load Cells

Truck scales are weighing devices operating harsh and tough working conditions. The load cells used for **Pre-Fabricated Armored Deck** series truck scales are not affected from major and sudden forces with their superior geometries during vehicle movements.

Their ability to work under water and washed by pressurized water condition tructures provide longterm performance under harsh environmental conditions and corrosive substances. With standardized loadcell outputs, no corner adjustments requirement makes most exact measurement guaranteed at every point.

Minimum Service and Maintenance Cost

Stainless steel load cells with completely hermetic sealed enclosure provides extended performance in harsh industrial environments.

With these superior properties of load cells, it significantly reduce maintenance costs.

Most importantly, it eliminates weighing failures that occurs on the truck scales unlike other load cells which are not equipped with completely hermetic sealed enclosure on the market place.

Our digital packages for Pre-Fabricated Armored Deck can be included these brands by your order:

Flintec Utilcell Transdutec Kelli Zemic

Additional Options and Accessories

Every business has different needs when it comes to work professionally.

PandCaspian Co. offers a variety of options to facilitate the truck scaling process.

We provide a full-service of truck scaling and its accessories.

Plate Defined Weighbridge Management System

Plate Defined Weighbridge Management System Plate Defined Weighbridge Management System is designed to detect the vehicle entering the platform. It records the vehicle license plate, in weighing process, camera ID transfers date and the time of vehicle entering the platform. The camera is linked with the computer installed in the weigh cabin. The length of the vehicle on the scale can also be recorded, optionally. Multiple cameras can be installed to take pictures at different angles at the same time. Anything would be practicable as the customer order.

Remote Display

If you want to observe the value of the weigh outside of the cabin, remote display is the right choice. It can be set up at any suitable place based on the available sites outside of the cabin. The value is clearly readable on red LED indicator with \(\) digits. Remote Display is so useful in a foggy, smoky and dusty weather, our remote displays make sharp, easy-to-read weight values.

Traffic Lights

One of the important matters in truck scale is organizing vehicle when the site is too crowded. Traffic lights is so useful for the organization of entry and exit by commanding truck drivers. It could be mounted in the weighing cabin or scale area. Barrier is another applicable part of traffic lights. It open and close the entry to improve the speed of weighing process.
